Regarding the petition 04-160, I find totally monopolistic of the NBA to try and shut this program down. I'm in sales & rely on this form of information while traveling from county to county. As of this time San Diego has not come on line for traffic, but I can't wait. The information that can be provided can help me provide my customers with greater expediency for our services, by getting the most current traffic situations available. Planning ahead is of great importance, as you well know. And their signal does not hinder that capability.

I don't know what I'd do without it now days, not to mention the overall programming you get with the XM radio. Therefore it gets my vote.

Thank You
Jim Kimball
